CREATIVITY CORNER

Creativity Corner was designed to enhance your child's Cognitive, Mental, Emotional, Social and Moral stability. As soon as they walk through the door their brains are clicking with ideas of new materials ready to put their heads together and brain storm.

Through this program they learn Conflict Resolution, The importance of friendship and how to deal with Constructive Criticism all the while preparing them for the opportunity to give back to the community. The program teaches children how to grow, cultivate and create their own nutritious meals. There are also hands on activities for older children participants that they may learn a trade through Home Improvement, Music, Farming, along with life skills. These programs are open to children with disabilities and others.

The children also have an opportunity to get involved with Praise dance, Choir and Theatre. Throughout the months the Lil' Blessins engage in activities with the senior communities for specific holidays such as Easter, Thanksgiving and Christmas. They create cards and crafts to distribute to the seniors along with goodie bags and entertain them with songs and/or dance.
